Assignment 1 – Marking Scheme

- [10] Assignment Presentation (NOT awarded if everything else fails)
    - o [5] Makefile and README
        - -3 Makefile not present or not working
        - -2 How to compile and make the program
        - -1 Where (which machines) info not present
        - -2 The executables and parameters are not specified
    - o [5] Code Style & Comment
        - -3 Ports are built in as numbers
        - -2 If fixed port fails, the program does not use a different port
        - -4 Un-modular
        - -2 More complicated than needed
        - -3 Poor comments
        - -3 No invalid/missing parameters warnings
        - -3 Wrong input format
- [90] Application works successfully
    - -90 Client/server crashes at startup
    - -90 <n_port> not printed
    - -90 No messages printed by the client
    - -50 The programs fail with subsequent messages
    - -40 The programs fail with subsequent clients
    - -20 The messages are not reversed properly
    - -10 Server works with a <req_code> other than the input
